Outline

Overview

- What is “family violence” data?
- Why should I use data?

Family Violence Data in Ohio

- Sources
- Findings

How to use data

- Grant-writing/Advocacy
- Planning/Evaluation
- Highlighted themes

Discussion/Q&A

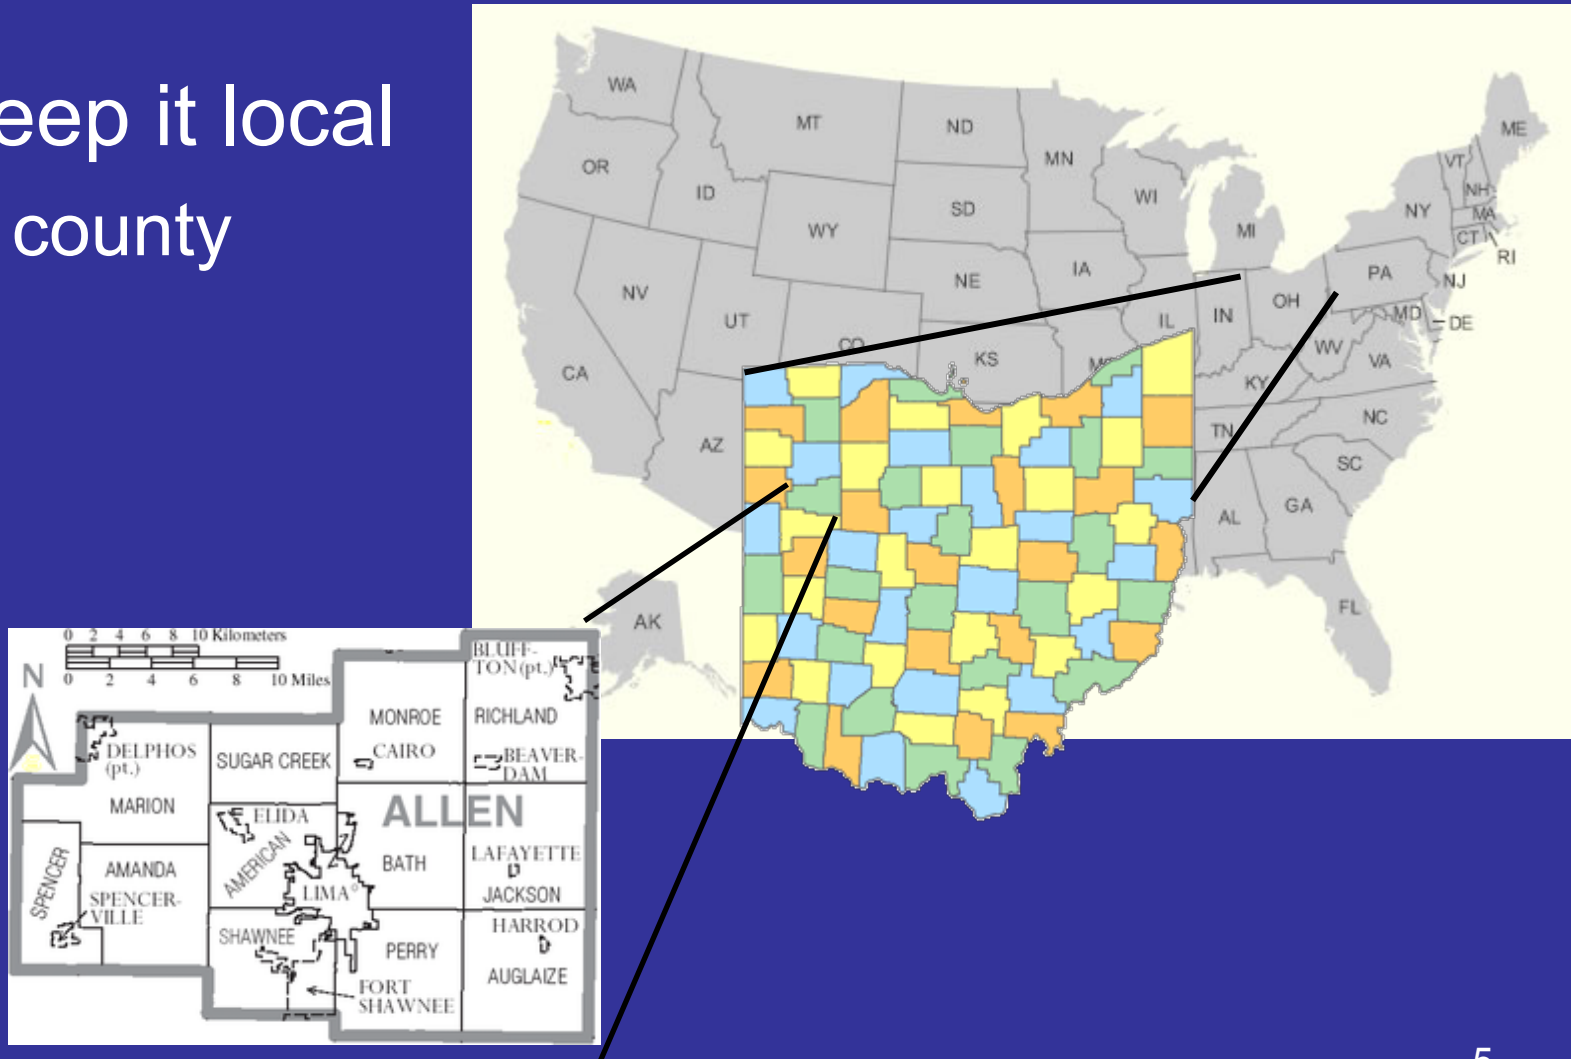

What is Family Violence Data?

*Information about
the risk factors for,
scope of,
and consequences of
of family violence
in Ohio.*

- *child maltreatment*
- *intimate partner violence*
- *elder maltreatment (EM)*

Two Principles

1. Keep it local
 - county

2 principles

1. Keep it local
 - county
2. Put it in context
 - Compared to what?

Context

- Period
 - How does my county compare to last year?
- Place
 - How does my county compare to others?
- Problem
 - How does elder maltreatment compare to other problems in my county ?

Why Use Data?

I DIDN'T HAVE ANY ACCURATE NUMBERS SO I JUST MADE UP THIS ONE.

www.dilbert.com scottadams@aol.com

STUDIES HAVE SHOWN THAT ACCURATE NUMBERS AREN'T ANY MORE USEFUL THAN THE ONES YOU MAKE UP.

5/8/08 ©2008 Scott Adams, Inc./Dist. by UFS, Inc.

HOW MANY STUDIES SHOWED THAT?

EIGHTY-SEVEN.

Why don't we use data?

The study's not valid because it didn't include women who didn't seek help.

The study's not valid because it didn't include emotional abuse.

The study's not valid because it didn't include Latinas.

The numbers don't capture what's really going on here.

You can get statistics to say anything you want.

Quantitative studies suppress victims' voices.

I don't care what the research says, we need to do [X]!

I'm afraid to use statistics because I don't really get them.

I've helped fill out the forms these data are based on. I know they're flawed.

Why don't we use data?

- Every source is imperfect
 - especially for complex issues like FV
- Different “case” definitions
 - fear of undercounting
- Difficult to find and report
 - Access local level data
 - Skills to report findings accurately

So - Why bother...?

- “If you don’t count it, it doesn’t count”
 - others use data
- “the numbers favor elder maltreatment”
- Builds credibility

Family Violence Data in Ohio: Sources

Sources of elder maltreatment data

- Surveillance
 - Ohio Family Health Survey (OFHS): physical IPV
 - National Elder Mistreatment Study
- Agency reports
 - Adult protective services (ODJFS)
 - SRI's in LTC facilities (ODH/AGO)

Public Health Surveillance

the ongoing, systematic collection, analysis, interpretation, and dissemination of data regarding a health-related event for use in public health action to reduce morbidity and mortality and to improve health

Examples

- Cancer registries (OCISS)
- Vital statistics
- Youth Risk Behavior Surveillance System
- Ohio Violent Death Reporting System
- Nothing on elder maltreatment

Why no elder maltreatment surveillance?

- Conceptual/legal definitions vary
 - Emotional abuse
 - Neglect
 - Self-neglect
- No “gold standard” measure
- Paucity of research

How Common?

- National Elder Maltreatment Study (2010)
 - Self-report telephone survey
 - 11% annual incidence
- National Elder Abuse Incidence Study (1998)
 - Sentinel surveillance
 - 1%
- Other studies
 - 2-10% annual incidence

Underlying Prevalence

- Cases that come to authorities' attention *and* those that do not.
- Interpolated from national data
 - assumes Ohio is similar to US average
 - assumes each county is similar to US average
- Range reflects uncertainty

Agency Reports

- Adult protective service reports
- Self-reported incidents in LTC facilities
- Only those cases that come to our attention
 - 7 - 20% of all cases?

Adult Protective Service Reports

- All 88 counties since SFY 2005-6
- Available by county
- Report ≠ individual

**Adult Protective Services
Yearly Management Summary Report**

Number of Counties Reporting: 88 SFY Start: 07/01/2007 SFY End: 06/30/2008
 Number of Total Admissions of A/D/S/E: 2,310

A. Type of Allegation(s)

Allegation	Self/Neglect	Sexual Abuse	Physical Abuse	Emotional Abuse	Neglected By Others	Total
Number of NEW Admissions of A/D/S/E	1,121	35	1,001	1,003	3,479	16,109
Number of PENDING Admissions of A/D/S/E	103	673	1	1	1,000	1,228
Total Number of PENDING Admissions of A/D/S/E	11	7	1	1	200	219

B. Outcome of Investigation

Outcome	Self/Neglect	Physical Abuse	Emotional Abuse	Neglected By Others	Total
Admission not completed due to Client/Year License Closed	61	2	1	7	71
Admitted to Institution	1	1	1	1	4
Placing Home Placement	1	1	1	1	4
Other	1	1	1	1	4
Referred to MDD	1	1	1	1	4
Referred to Other Agencies	1	1	1	1	4
Total	65	7	3	10	85

C. Assessment Completed

Assessment	Physical Abuse	Self/Neglect	Emotional Abuse	Neglected By Others	Exploitation	Sexual Abuse	Total
Client agreed to services/initial or annual	187	2,225	243	379	459	1,655	6,403
Client strongly refused services	139	2,024	159	230	265	4	4,821
Client unable to agree to or refuse services	94	352	26	217	77	0	696
Client Ordered services	113	71	118	413	11	11	630
Referred to Other Services, Support or Escorted	6	1,010	9	16	320	0	1,355
Services needed but not available	474	59	118	433	16	1	1,091
Total	523	4,725	559	1,046	1,150	15	8,419

D. New-Validated A/D/S/E

Outcome	Physical Abuse	Self/Neglect	Emotional Abuse	Exploitation	Physical Abuse	Sexual Abuse	Total
Client agreed to services/initial or annual	26	53	28	47	12	15	161
Client strongly refused services	4	27	14	30	18	0	93
Client unable to agree to or refuse services	101	23	2	24	10	1	161
Client Ordered services	2	2	0	0	0	0	4
Referred to Other Services, Support or Escorted	349	0	0	0	0	0	349
Services needed but not available	875	128	12	34	0	0	1,039
Total	1,467	245	44	105	40	16	1,877

E. New-Validated A/D/S/E

Outcome	Physical Abuse	Self/Neglect	Emotional Abuse	Exploitation	Physical Abuse	Sexual Abuse	Total
Client agreed to services/initial or annual	26	53	28	47	12	15	161
Client strongly refused services	4	27	14	30	18	0	93
Client unable to agree to or refuse services	101	23	2	24	10	1	161
Client Ordered services	2	2	0	0	0	0	4
Referred to Other Services, Support or Escorted	349	0	0	0	0	0	349
Services needed but not available	875	128	12	34	0	0	1,039

“Self-Reported Incidents” in long term care facilities

- LTC facilities must reported any allegations of abuse/neglect/exploitation
- Each year, about 8,000 “SRI’s” reported to Ohio Department of Health
- ~ 3,100 referred to Medicaid Fraud Control Unit (AGO)
 - ~ 300 investigations
 - ~ 30 cases/convictions
 - tallies available by county

Family Violence Data in Ohio: Findings

<http://www.healthpolicyohio.org/projects/ohio-family-violence-prevention-project.php>

Family Violence in

Ohio

These data describe common types of violence perpetrated by family members or caregivers in our state each year. We present the best available, most recent estimates. Nonetheless, our figures are conservative and represent only part of the burden family violence places on our families and communities. All figures are estimates or annual averages.

Each year in our state...

38,000 – 56,000	children are abused or neglected	88,000 – 115,000	adults are physically abused by a current or former intimate partner	90,000 – 115,000	seniors in the community are abused, neglected or financially exploited
105,245	reports of abuse or neglect are filed with children's services	21,800	people are arrested for intimate partner violence	6,900 – 13,700	seniors in LTC facilities are abused, neglected or financially exploited
26,853	children are placed in custody	18,822	people file petitions for civil protection orders	7,530	reports of abuse, neglect or exploitation are filed for seniors in the community
		3,998	adults seek shelter in domestic violence shelters in the county	3,163	reports of abuse, neglect or exploitation are filed for seniors in LTC facilities

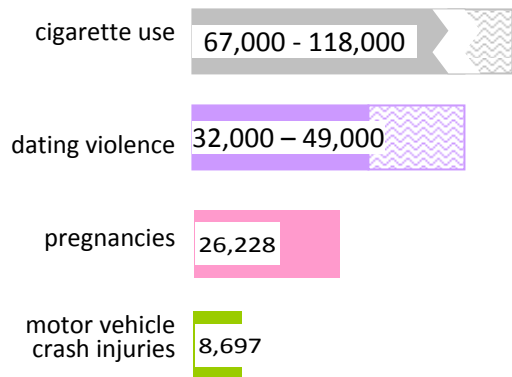

- It is difficult to measure the true prevalence of family violence; many victims never come to the attention of authorities.
- Reports to local children's service agencies typically exceed the estimated number of abused or neglected children. This is likely due to multiple reports filed for a single child. Also, many children are placed in custody for reasons other than abuse or neglect (e.g., delinquency).
- Elder abuse/neglect figures exclude self-neglect and victims <60 years old. (LTC = long term care)

This profile is part of an 88-county series provided by the **Ohio Family Violence Prevention Project** – a collaborative project of the Health Policy Institute of Ohio and the Ohio State University College of Public Health with support from the HealthPath Foundation of Ohio. For additional copies and a detailed description of how we calculated these figures, please visit: www.healthpolicyohio.org/OFVPP_CountyProfiles.html

Suggested citation: Health Policy Institute of Ohio. *Family Violence in Ohio*. Columbus, OH: Health Policy Institute of Ohio; 2010.

In Ohio, how does family violence compare to other threats among ...?

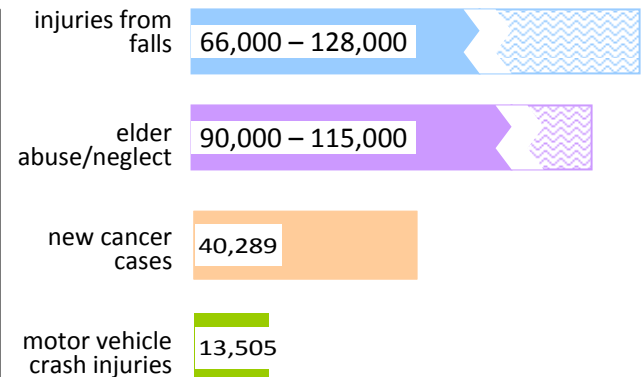

teenage girls (age 15-19, est. # /year)

adult women (age 18+, est. # /year)

seniors (age 60+, est. # /year)

- For example: each year in Ohio between 56,000 and 78,000 adult women experience physical intimate partner violence; in comparison, 51,007 adult women are injured in motor vehicle crashes.

How do different types of counties compare?

County type (# of counties)	Petitions for civil protection orders (per 10,000 adults)	Reports of abuse, neglect or exploitation in LTC facilities (per 100 resident beds)
Major metropolitan (6)	25.9	2.8
Suburban (18)	22.7	1.8
Smaller metropolitan (7)	24.5	2.2
Appalachian (29)	28.9	2.2
Non-Appalachian rural (28)	18.4	1.7
<i>State mean (88)</i>	21.6	2.3

- **Appalachian counties** have a higher rate of petitions for civil protection orders (CPO's).
- **Major metropolitan counties** have a higher rate of reports of abuse, neglect or exploitation in LTC facilities.
- Differences in data collection limit our ability to compare other indicators of family violence across counties.

Is family violence increasing?

It is hard to say. Some data sources suggest family violence is increasing; others suggest it is stable or decreasing. Within a location, changes over time are largely due to changes in victims' ability to access

Mean annual rate of petitions for civil protection orders, per 10,000 adults, Ohio, 2000-2008

services. This graph, for example, suggests a significant increase in petitions for CPO's. This trend could reflect a growing awareness or ability of victims to request CPO's. For a discussion of when differences are noteworthy, please see the introduction.

Family Violence in

Allen County

These data describe common types of violence perpetrated by family members or caregivers in our county each year. We present the best available, most recent estimates. Nonetheless, our figures are conservative and represent only part of the burden family violence places on our families and communities. All figures are estimates or annual averages.

Each year in our county...

350 – 530 children are abused or neglected

584 reports of abuse or neglect are filed with children's services

230 children are placed in custody

800 – 1,000 adults are physically abused by a current or former intimate partner

170 people are arrested for intimate partner violence

166 people file petitions for civil protection orders

129 adults seek shelter in domestic violence shelters in the county

860 – 1,100 seniors in the community are abused, neglected or financially exploited

90 – 170 seniors in LTC facilities are abused, neglected or financially exploited

42 reports of abuse, neglect or exploitation are filed for seniors in the community

27 reports of abuse, neglect or exploitation are filed for seniors in LTC facilities

- It is difficult to measure the true prevalence of family violence; many victims never come to the attention of authorities.
- Reports to local children's service agencies typically exceed the estimated number of abused or neglected children. This is likely due to multiple reports filed for a single child. Also, many children are placed in custody for reasons other than abuse or neglect (e.g., delinquency).
- Elder abuse/neglect figures exclude self-neglect and victims <60 years old. (LTC = long term care)

This profile is part of an 88-county series provided by the **Ohio Family Violence Prevention Project** – a collaborative project of the Health Policy Institute of Ohio and the Ohio State University College of Public Health with support from the HealthPath Foundation of Ohio. In Allen County, how does family violence compare to other threats among ...?

teenage girls (age 15-19, est. # /year)

adult women (age 18+, est. # /year)

seniors (age 60+, est. # /year)

- For example: each year in our county between 510 and 700 adult women experience physical intimate partner violence; in comparison, 565 adult women are injured in motor vehicle crashes.

How do we compare to other counties?

	Allen County	Mean of 7 smaller metro counties	State mean
Civil protection order petitions (per 10,000 adults)	21.0	24.5	21.6
Reports of abuse, neglect or exploitation in LTC facilities (per 100 resident beds)	1.5	2.2	2.3

- Allen County has **about the same rate** of petitions for civil protection orders (CPO's) compared to similar counties in Ohio.
- Allen County has **about the same rate** of reports of abuse, neglect or exploitation in LTC facilities compared to similar counties in Ohio.
- Differences in data collection limit our ability to compare other indicators of family violence across counties.

Is family violence increasing?

It is hard to say. Some data sources suggest family violence is increasing; others suggest it is stable or decreasing. Within a county, changes over time are largely due to changes in victims' ability to access

Mean annual rate of petitions for civil protection orders, per 10,000 adults, Allen County, 2000-2008

services. This graph, for example, suggests a significant increase in petitions for CPO's in our county. This trend could reflect a growing awareness or ability of victims to request CPO's. For a discussion of when differences are noteworthy, please see the introduction.

To talk with someone about family violence, contact:

Child Abuse Hotline: 1-800-4-A-CHILD

Ohio Domestic Violence Network 1-800-934-9840

Ohio Area Agencies on Aging: 1-866-243-5678

How do we compare to other counties?

	Allen County	Mean of 7 smaller metro counties	State mean
Civil protection order petitions (per 10,000 adults)	21.0	24.5	21.6
Reports of abuse, neglect or exploitation in LTC facilities (per 100 resident beds)	1.5	2.2	2.3

- Allen County has **about the same rate** of petitions for civil protection orders (CPO's) compared to similar counties in Ohio.
- Allen County has **about the same rate** of reports of abuse, neglect or exploitation in LTC facilities compared to similar counties in Ohio.
- Differences in data collection limit our ability to compare other indicators of family violence across counties.

When are differences noteworthy?

- Apparent differences are often due to chance
- Calculate a range beyond which we are confident differences are (probably) not due to chance
 - “confidence interval”
- Fewer cases → larger confidence intervals

Is family violence increasing?

It is hard to say. Some data sources suggest family violence is increasing; others suggest it is stable or decreasing. Within a county, changes over time are largely due to changes in victims' ability to access

Mean annual rate of petitions for civil protection orders, per 10,000 adults, Allen County, 2000-2008

services. This graph, for example, suggests a significant increase in petitions for CPO's in our county. This trend could reflect a growing awareness or ability of victims to request CPO's. For a discussion of when differences are noteworthy, please see the introduction.

How Can I Use Data?

Ways of Using Data

- Planning

- Evaluation

Use data to find an answer

- Grant-Writing

- Advocacy

Use data to support your answer

Explaining County-Level Variation

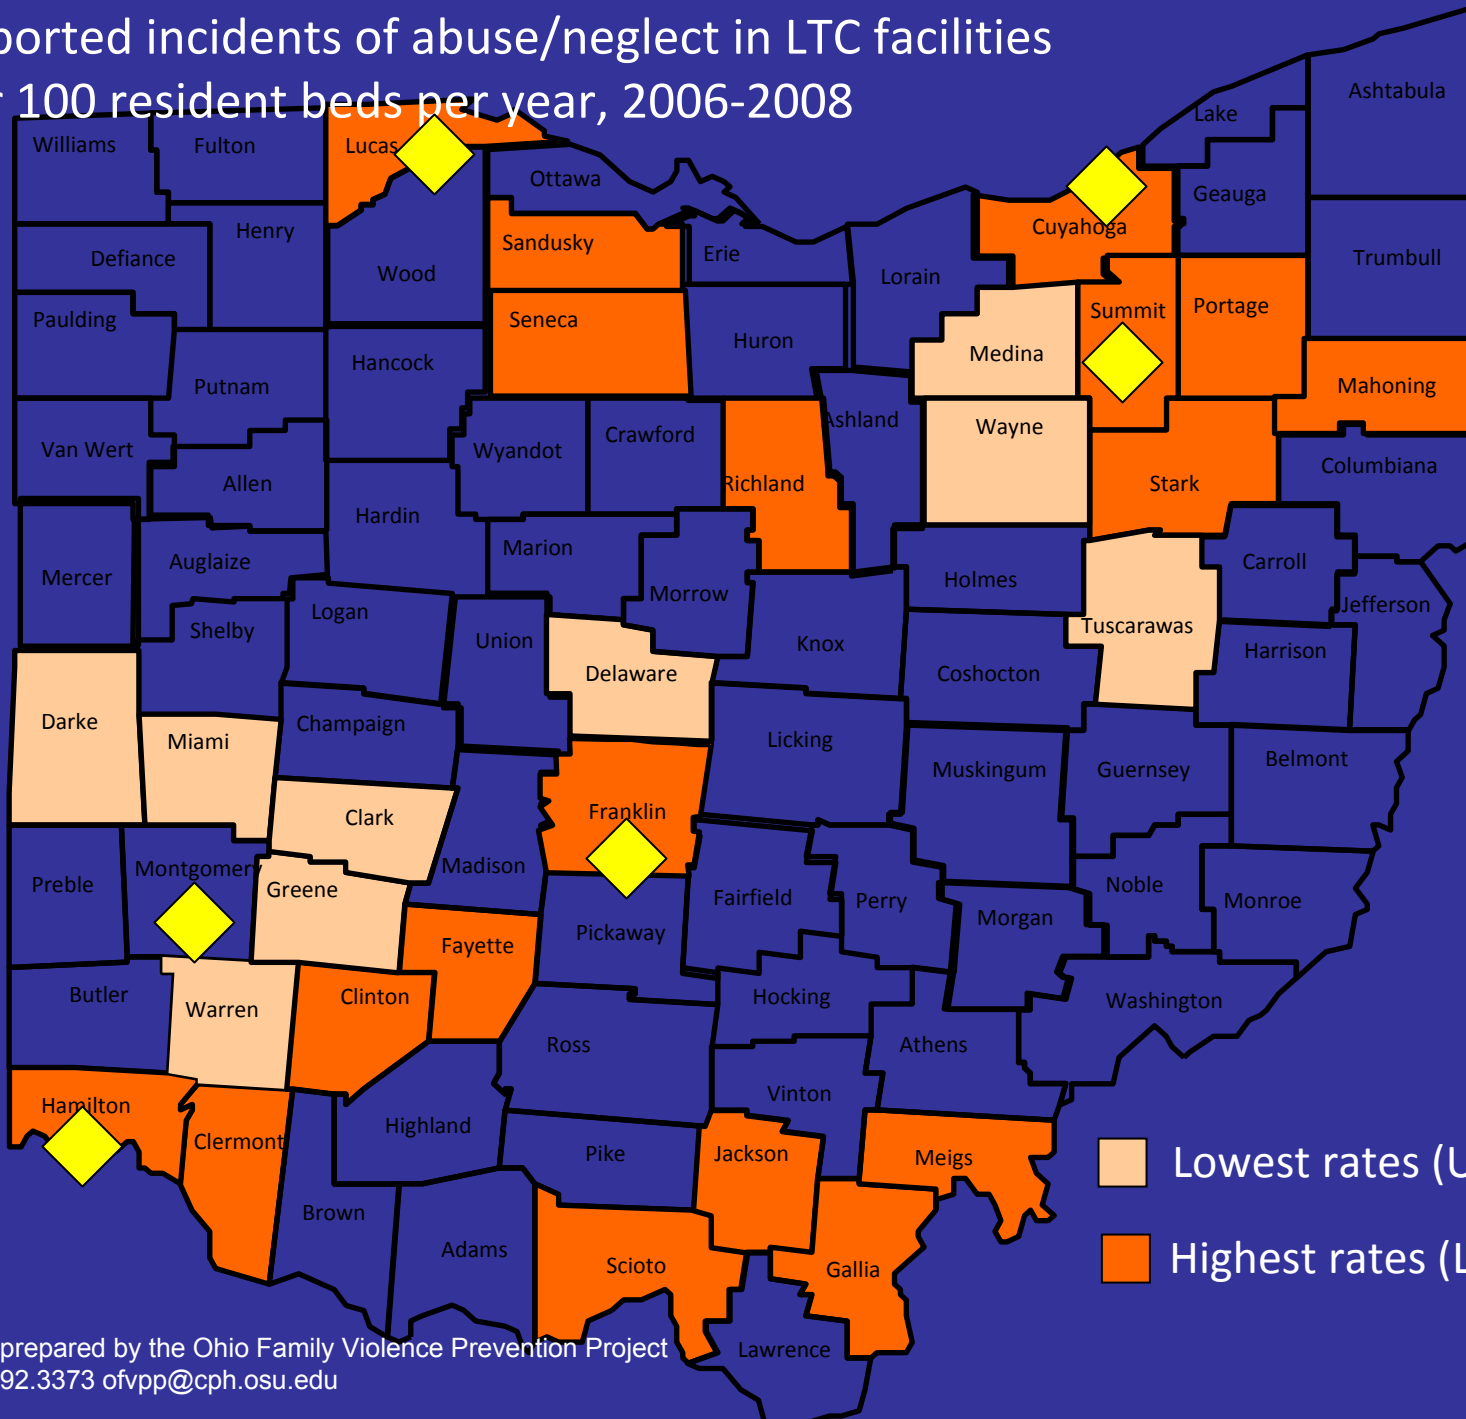

1. Reporting procedures
2. Administrative differences
3. Organizational capacity
4. Underlying prevalence

Mean annual # (with 95% CI) of self-reported incidents
of abuse/neglect in long term care facilities per 100 resident beds
in 62 Ohio counties, 2006-2008

Source: Ohio Attorney General, Medicaid Fraud Control Unit; Ohio Department of Health

- Grant-Writing
 - Advocacy
- } Use data to support your answer

Using data to show that FV in Ohio is...

- Common
- Consequential
- Changeable

Available Research Findings

	Child abuse & neglect	Intimate partner violence	Elder abuse & neglect
Common	✓	✓	✓
Consequential	✓	✓	✓
Changeable	✓	✓	

To show that FV is common...

- Emphasize *past-year* prevalence
- Emphasize local
- Case reports build credibility

Each year in Allen County...

- At least 860 seniors in the community are abused or neglected
- At least 90 seniors in long term care facilities are abused or neglected

To show that FV is common...

- Emphasize *past-year* prevalence
- Emphasize local
- Case reports build credibility
- Put in context of other problems

Selected threats to seniors' health in Allen County:

Estimated number of cases per year among seniors age 60+

injuries from falls and elder abuse/neglect are based on survey samples and present a low and high estimate

To show that FV is consequential...

- Association with other outcomes
 - illness & injury
 - disability
 - employment
 - homelessness
 - death
- Cost
 - agency burden

To show that FV is changeable...

- Highlight change over time
- Consider differences across place
- Cite intervention research

petitions for civil protection orders per 10,000 residents: Allen County vs. all smaller metro counties in Ohio, 2000-2008

Source: Supreme Court of Ohio

Adult Protective Services Reports per 1,000 seniors by Area Agency on Aging, 2006 vs. 2008

Note: Report rates exclude reports of self-neglect

Source: ODJFS, US Census

Slide prepared by the Ohio Family Violence Prevention Project, a project of the Health Policy Institute of Ohio and the Ohio State University College of Public Health. 614.292.3373 ofvpp@cph.osu.edu

We need to acknowledge...

- FV is not equally common everywhere
- FV is not always getting worse
- Not all programs and policies work

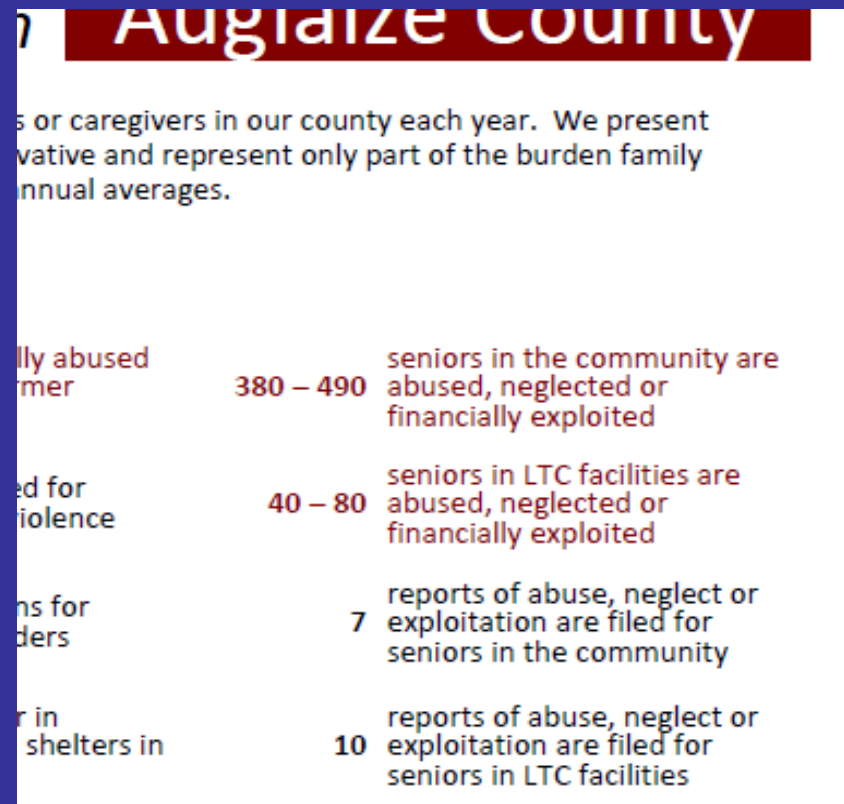

Themes

Themes

- Each year, many victims of family violence never come to the attention of authorities.
- Certain types of family violence are every bit as common as other, more widely recognized threats to health and well-being.

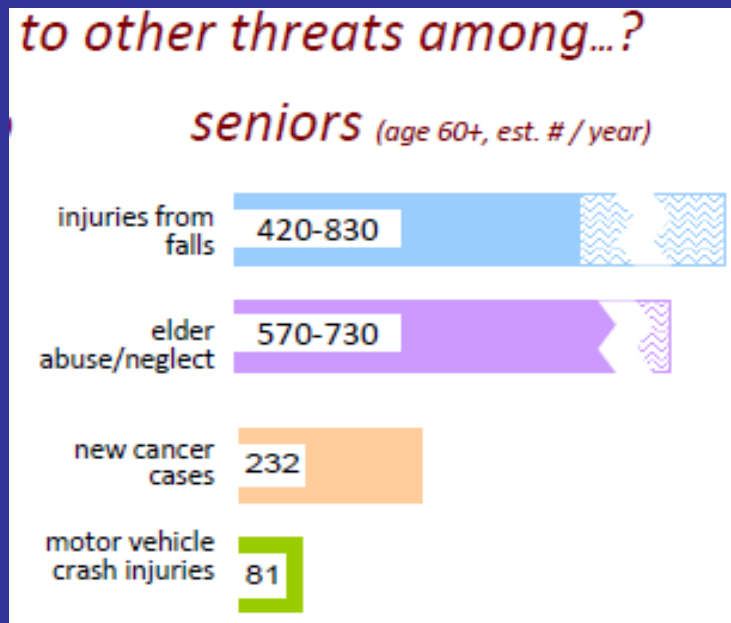

Each year, many victims of family violence never come to the attention of authorities.

“According to a recent study, at least 380 elders are abused or neglected each year in Auglaize County, yet the local adult protective service agency only received 7 reports.”

Certain types of family violence are every bit as common as other, more widely recognized threats to health and well-being.

“One recent study estimated that each year in Hancock County, at least 570 seniors are abused or neglected – more than double the number of new cancer cases.”

Quoting A Range

- Can be confusing, unwieldy
- 3 options:
 - between
 - at least
 - as many as

- “...a recent study found that between 860 and 1,100 seniors are abused or neglected in our county each year.”
- “...a recent study found that at least 860 seniors are abused or neglected in our county each year.”
- “...a recent study found that as many as 1,100 seniors are abused or neglected in our county each year.”

A Plea and a Warning

- Know the details!
- Read the relevant parts of “Sources and Methods”
- Avoid undermining your work and the data

Questions/Comments

What if this
makes
my agency
look bad?

Thank you
